# What you will learn

## How to master the mining modules of your Micromine software, by working through the key features:

- Use Micromine's Pit Optimiser to optimise a real life resource model for a potential open pit project.
- Use Micromine's Pit Design to design a an open pit.
- Create an optimised mine schedule.

## How to get the most out of your mine:

- Gain a greater understanding of Micromine's mining tools and how to optimise your mine.
- Use tools in Micromine specifically suited for post-exploration work.

Please contact MICROMINE at [marketing@micromine.com](mailto:marketing@micromine.com) to apply, or visit [www.micromine.com](http://www.micromine.com) for further information and to register your interest in our upcoming courses.

With offices located throughout the world's major mineral producing capitals, MICROMINE is the leading provider of intuitive software solutions that deliver operational efficiencies through every step of the mining and exploration process.
