

BANGKA TIN MINING TECHNOLOGY SEMINAR

The Smart Way to Find, Mine and Process Tin.

Five technology companies will provide presentations on the new technologies being used in exploration, mining and processing of tin ore.

The new technologies provide Explorers and Miners with immediate benefits and cost savings.

- **Micromine** - Modern electronic mine management, exploration and resource modelling methods.
- **Dragflow** - The revolutionary new method for offshore and onshore dredge mining
- **Sepro Mineral Systems** - How to capture and process ultrafine tin
- **Sonic Drill** - Faster drilling with 100% core recovery onshore and offshore
- **Carlson Software** - Providing powerful, comprehensive and easy-to-use software

Wednesday, 16 August 2017

10:00 - 15:00 WIB

Novotel Bangka Hotel and Convention Center
Jalan Soekarno Hatta Km. 5, Pangkalpinang
Kepulauan Bangka Belitung 33171
