Activating a New Network Licence

Thank you for using Micromine.

Please note that activating your dongle for the first time in Micromine 2018 will also require you to **reactivate your Micromine 2016.1 licence**. If you require assistance, please contact your local support office.

On the server

Install the LM-X on your server. This can be downloaded from our website
https://www.micromine.com/downloads-micromine/
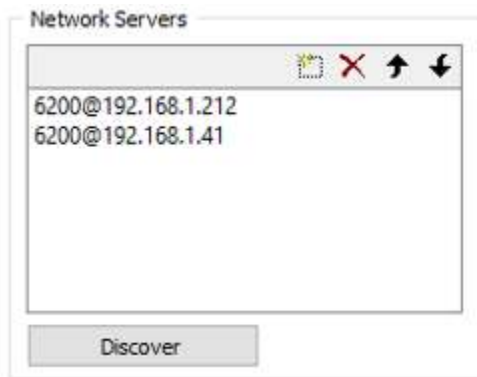

To download LM-X from the Micromine Website.

1. Click **Request a download link**.
2. Fill out the online form and download the Network Licence Server Installer.

On the server, please follow these steps;

1. Double click on **MICROMINE_Network_Licence_Server_Installer.exe** to install
2. Click **next, tick** the I accept the terms in the License Agreement and click **Next, Next**
3. **Tick** the **Start LM-X license server after installation**. Then click **Next** and **Finish**
4. Ensure LM-X is running and plug in the dongle.

On your Local machine, please follow these steps;

1. Start Micromine, **c**lick **Start License Manager.**
2. Select the **Network Server** tab
3. Click **Discover** at the bottom of the page to discover your network server. (if the server is undetectable you can click on new and type in 6200@(IP address)

4. Click **Activate License** and **Next**.
5. Select the **server** from the dropdown and **Next**.
6. Fill out the online form including the sent activation code.
7. Click on **Finish**
8. Micromine will start.

If you are having trouble installing your Micromine software, or require further assistance, please ensure to contact us.

We hope you enjoy using Micromine and we look forward to working closely with you.
