INTRODUCTION TO MICROMINE

What you will learn

How to master the basics of your Micromine software, by working through the key features:

- Import and assess data from a newly acquired exploration project in order to make recommendations on future drilling.
- Visual integration of different 2D and 3D data using the Vizex (Visual Explorer) interface.
- Generate drillhole sections and produce printed output.

How to get the most out of your exploration data:

- Gain a greater understanding of Micromine to perform tasks beyond just displaying data.
- Use tools in Micromine specifically suited for exploration work.

Don't miss this fantastic opportunity!
